

**1st International
Graduate from Mexico
Jorge Smythe**

It was a real pleasure for me to complete my high school at this institution. To begin with, the service provided is excellent; the staff are very stable staff members who are very willing to help you in every possible way. Also the fact that you can do your studies from your home was key for me to be able to complete my studies. I started acting and dancing from a very early age and it became pretty difficult to attend a regular school due to my busy and always changing schedule. The instruction received from this institution is spot on and fast.

I have no words to thank Mr. L. Ronald Hubbard for the Study Technology he developed. It has made my life very easy in many different ways. First of all it was very smooth to complete my high school studies as I can duplicate the materials being studied and most of all I can apply the data. Another example of how much this helped is what happened to me at a class I'm taking at university on "Aesthetics." As homework, the class had to read a book written by Hegel so we could discuss it at the next class. I actually enjoyed the book very much and found it very interesting. When I went to the next class, I found out that nobody else had actually understood the book!!! Thanks to Mr. Hubbard, I can learn anything I want to, and be able to apply it.
